Company Profile

TraumaSim® provide a range of medical trauma expertise in simulation and training solutions for educators and trainers across global industries.

The use of simulation in modern healthcare and emergency response training is a growth industry, and proven the more realistic the simulation, the greater outcomes. Significantly increasing student competency, resilience, retention, and improving the chance of patient survival, while greatly reducing the effects of Post-Traumatic Stress Disorder (PTSD) on attending personnel.

Nola Pearce
Founder & Managing Director

TraumaSim® provides hyper-realistic products and services to assist in the training of medics, military, and emergency services personnel, first responders and healthcare professionals across the globe. Today, this style of training is also being offered to civilians as a necessary response to the world we live in, making TraumaSim 's services a vital necessity.
All our products are designed and manufactured in Perth, Western Australia, offering a bespoke, customised service built on the backbone of medical science, healthcare, nursing and first aid training.

What We Offer

Task Trainers Overview

Wound Packing | Tourniquet Application | Combination Units | Bespoke Product Design | Suture

TraumaSim® offers a Part Task Trainer product range that allows a variety of training techniques to be practiced on medically accurate and realistic body parts and wounds, to prepare trainees to respond effectively to major real-life trauma events. Our products focus on haemorrhage control, haemostatic dressing, tourniquet application and suturing, all supporting vital first aid training as well as tactical combat casualty care (TCCC), medic and paramedic programs

Wounds Overview

Nursing Wounds | Military Wounds | Trauma Wounds | Customised Pigments

We design and create individual wounds from durable, life-like silicone, the tapered edges and self-adhesive backing assist with application, creating a seamless look, all wounds can be washed and reused many times, allowing repeatable use and practice. Wounds can be applied to live role players or training manikins and are available in kits specific to applications and industries, such as Nursing, Military and Trauma.

TraumaWear Overview

Silicone Wounds and Injuries | Rapid Application Wearables | Medical Accuracy | Repeatable Use

We provide a vast range of realistic, silicone wounds and injures made from high quality, durable materials with medically accurate detailing. The TraumaWear range allows quick, repeatable application for those without the time for detailed moulage. All wounds can be washed and reused many times, allowing repeatable use and practice, and can be sold individually, or in kits specifically designed for Trauma, Nursing or Military.

Clinical Simulation Overview

Skills Trainers | Simulation Skins | Moulage Kits and Consumables | Latex-Free Products | Ben Nye Distributor

We provide a range of realistic, silicone skins and skills trainers made from high quality, durable materials with medically accurate detailing. The clinical simulation range encourages compassion and empathy in the trainees, improving skills retention and enhanced bedside manner. The range allows quick, repeatable application on live role players or on the Laerdal SimMan manikins. All products can be washed and reused many times, allowing repeatable use and practice.

Moulage Overview

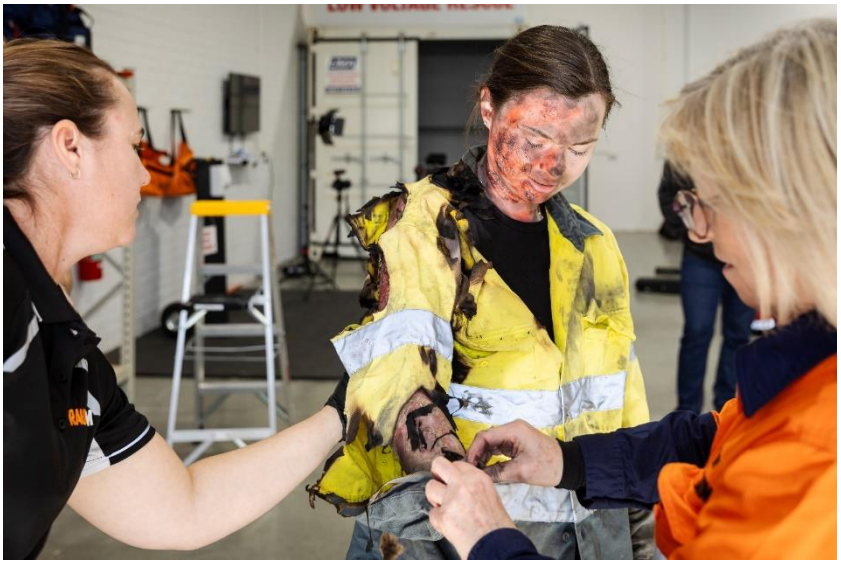

Onsite technicians | Workshop and Training | Kits and Consumables | Latex-Free Products | Ben Nye Distributor

The highly experienced TraumaSim® team have been delivering moulage services and workshops to a variety of military, medical and emergency response personnel around the world since 2008. We can apply medically accurate wounds and injuries to Mannikins or role players in-situ, and we also offer engaging and informative hands-on workshops.

Simulation Support

Consultation | Planning |Equipment Hire | Special Effects | Role Players

Our professional team has the drive and capability to achieve realism in simulation, promote skills retentions and improve overall training goals and outcomes. Offering bespoke scenarios, solutions, products, and services, we can work with experts across industries to develop realistic scenarios and specific medically accurate trauma wounds and injures, to create an unforgettable learning environment.

Products

TraumaSim® prides itself on the creation of realistic, durable, and customisable Australian made products that serve to improve the training of medics, military, and emergency services personal, first responders and healthcare professionals across the globe.

Task Trainers

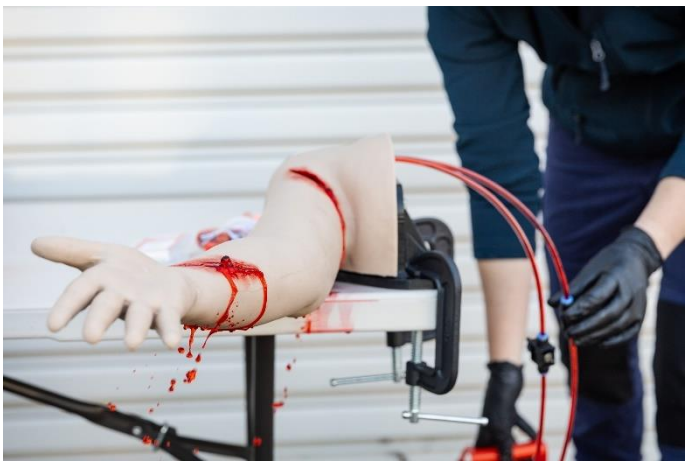

Our products focus on haemorrhage control, haemostatic dressing, tourniquet application and suturing – all which support vital first aid training plus tactical combat casualty care (TCCC), medic and paramedic programs around the world.

Our task trainers are latex-free, made from medical grade quality silicone with a life-like look and feel, are available in 11 different skin colours (with customisation options) and are available in various body parts (arm, leg, thigh, torso) with varying wounds and injuries such as lacerations, gunshot wounds or amputation and include bleeding capability.

Silicone Wounds – Self-Adhesive

Our realistic wounds & injuries are made with high quality silicone providing an exceptionally durable product with tapered edges to assist with application and blending. All of our Silicone wounds are hand painted

Available in 11 colours (or customised) to promote diversity and inclusion in the classroom, TraumaSim 's specialty wounds have been developed to enhance training and provide a visual tool for student assessment. Simply add some moulage (Stage Blood or Fresh Scab) to relevant wounds for additional realism.

Wounds can be applied to live role players or training manikins and are available in kits specific to applications and industries; such as Nursing, Military and Trauma. See the full individual range below.

TraumaWear

Liven up you're training and really prepare your trainees for the real world with our TraumaWear range! These medically accurate wearable, robust wounds and injuries provide cost effective, rapid, and repeatable application to add realism to your training and simulations.

The forearm range is simply pulled on and set in place. Talc powder can be applied to human skin first to aid with application. The leg and upper arm range are held in place with a strap & clip system. Simply pull on or tighten the straps around arm or leg and add Stage Blood or Fresh Scab as desired.

The items with bleeding capacity will include a plastic syringe connected via tubing which should all be rinsed thoroughly after each use. Bespoke items can be created to meet your specific requirements.

Clinical Simulation

Students and professionals alike are seeking advancements in simulated learning to meet the growing need across the world to achieve higher competencies in emergency, first aid, medical and healthcare training. TraumaSim® have the drive and capability to provide solutions, via products and/or services, that achieve realism in simulation, promote skills retention and improve overall goals and outcomes.

Whether you are looking to humanise your manikins, and in turn increase student empathy and compassion or are actively challenging the students to understand the correct techniques and skills required to achieve professionalism and competencies in the clinical environment, TraumaSim's clinical simulation range will bring medically accurate equipment and realism to the training environment.

Moulage

Moulage, French for casting or moulding, is the art of applying mock injuries for the purpose of training emergency response teams and other medical and military personnel. The application of moulage in a scenario dramatically increases the realism required to overcome the initial shock factor when responding to a real-life emergency.

Having trained internationally in Advanced Moulage and Disaster Exercise Design in the United States, we are confident our skills and abilities are leading the industry globally, resulting in only the most advanced knowledge, techniques, materials, and tools being applied in our services, training workshops and moulage consumables.

As an authorised Ben Nye distributor, we use only the best moulage tools and materials and are proud to have developed our very own TraumaSim® Casualty FX Moulage Palette – boasting 8 of our favourite colours for the best moulage application! See the full range below.
