EMERGENCY FIRST RESPONDERS

STRENGTHENING CAPABILITIES OF FIRST RESPONDERS

TraumaSim Group provides professional medical trauma expertise, together with real-world moulage and simulation solutions, to improve training and strengthen the capabilities of first responders worldwide.

It has been proven that the more realistic the simulation in emergency trauma training, the better the outcomes - including significantly increasing student competency; improving the chance of patient survival; and greatly reducing the effects of PTSD on first responders. TraumaSim has the experience and expertise to create real-world scenarios and realistic simulations to suit any training situation, including bespoke, medically accurate task trainers or silicone wounds and injuries that can be applied to role players or manikins.

SIMULATION SUPPORT

CONSULTATION | PLANNING | EQUIPMENT HIRE
SPECIAL EFFECTS | ROLE PLAYERS

Our professional team has the drive and capability to achieve realism in simulation, to promote skills retention and improve overall training goals and outcomes. Offering bespoke scenarios, solutions, products and services, we can work with emergency first responders to develop realistic scenarios and specific medically accurate trauma wounds and injuries, to create an unforgettable learning environment.

TRAUMAWEAR

SILICONE WOUNDS & INJURIES | RAPID APPLICATION WEARABLES
MEDICAL ACCURACY | REPEATABLE USE | MANIKIN ADD-ONS

All of our realistic wounds and injuries are made from high quality, durable materials with medically accurate detailing. The tapered edges on the individual wounds assist with application and blending, and enable quick application for those without the time for detailed moulage. The TraumaWear range is a rapid repeatable application solution.

TASK TRAINERS

SUTURE | WOUND PACKING | TOURNIQUET APPLICATION
COMBINATION UNITS | BESPOKE PRODUCT DESIGN

TraumaSim's Part Task Trainer product range allows a variety of training techniques to be used on medically accurate and realistic body parts and wounds, to prepare trainees to respond effectively to major real-life trauma events. Our products focus on suturing, haemorrhage control, haemostatic dressing and tourniquet application, all supporting vital first responder programs.

MOULAGE

ONSITE TECHNICIANS | WORKSHOPS & TRAINING
KITS & CONSUMABLES | LATEX-FREE PRODUCTS | BEN NYE DISTRIBUTOR

The highly experienced TraumaSim team has been delivering moulage services, training and workshops to emergency first responder trainers since 2008. Our medically accurate wounds and injuries can be applied to manikins or role players in-situ, and we also offer informative hands-on workshops to help upskill your trainers and empower them to add realism to their next scenario.
