TRAUMASIM®

FIRST AID TRAINERS

ADDING REALISM TO FIRST AID TRAINING WORLDWIDE

Harnessing decades of professional medical trauma expertise, TraumaSim Group is able to provide real-world moulage and simulation solutions that can significantly enhance the outcomes in first aid training.

With a passion and commitment to realism in training, our goal is to eliminate preventable fatalities from trauma-related injuries by utilising realistic simulation. Our products and services allow First Aid Trainers to quickly and impactfully add realism to their course delivery, enabling them to elevate their training environment and helping everyday civilians become competent first responders. It has been proven that the more realistic the simulation in emergency trauma training, the better the outcomes, including significantly increasing student competency; improving the chance of patient survival; and greatly reducing the effects of PTSD on first responders.

TASK TRAINERS

SUTURE | WOUND PACKING | TOURNIQUET APPLICATION
COMBINATION UNITS | BESPOKE PRODUCT DESIGN

TraumaSim's Part Task Trainer product range allows a variety of training techniques to be used on medically accurate and realistic body parts and wounds, to prepare trainees to respond effectively to major real-life trauma events. Our products focus on suturing, haemorrhage control, haemostatic dressing and tourniquet application, all supporting vital first aid training and paramedic programs.

MOULAGE

ONSITE TECHNICIANS | WORKSHOPS & TRAINING
KITS & CONSUMABLES | LATEX-FREE PRODUCTS | BEN NYE DISTRIBUTOR

The highly experienced TraumaSim team has been delivering moulage services, training and workshops to first aid trainers since 2008. We can apply medically accurate wounds and injuries to manikins or role players in-situ, and we also offer engaging and informative hands-on workshops, helping you add realism to your next course delivery.

TRAUMAWEAR

SILICONE WOUNDS & INJURIES | RAPID APPLICATION WEARABLES
MEDICAL ACCURACY | REPEATABLE USE | MANIKIN ADD-ONS

All of our realistic wounds and injuries are made from high quality, durable materials with medically accurate detailing. The tapered edges on the individual wounds assist with application and blending, and enable quick application for those without the time for detailed moulage. The TraumaWear range is a rapid repeatable application solution.

SIMULATION SUPPORT

CONSULTATION | PLANNING | EQUIPMENT HIRE
SPECIAL EFFECTS | ROLE PLAYERS

Our professional team has the drive and capability to achieve realism in simulation, to promote skills retention and improve overall training goals and outcomes. Offering bespoke scenarios, solutions, products and services, we can work with first aid educators to develop realistic scenarios and specific medically accurate trauma wounds and injuries, to create an unforgettable learning environment.
